

ASSOCIATE IN APPLIED SCIENCE INTERIOR DESIGN

(65 hrs. min.)

CIP: 50.0408

Upon completion of the 65-hour interior design degree and a four-year professional internship, or a 95-hour interior design degree and a three-year professional internship, graduates are qualified to take the National Council of Interior Design Qualifications (NCIDQ) exam. Students must pass the NCIDQ to practice as licensed interior designers in New Mexico. As an alternative, the 37-hour certificate in interior design will qualify students to practice as a decorator but not as a licensed designer.

Students should select all courses in consultation with an adviser. To schedule an advisement appointment call (505) 428-1664.

Note: A.A.S. degrees are designed to prepare students for entry-level positions in specific occupations; they are not generally intended to transfer to four-year institutions. For more information on transfer, please refer to Page X of this catalog, or speak with an academic adviser.

PROGRAM OUTCOMES

Upon completion of this program, students will be able to:

- Present construction documents demonstrating proficiency in technical drawing skills and systems and building codes.
- Create interiors that meet varied human environmental needs and apply the design process and principles.
- Apply business principles, practices and ethics to project management.
- Create interiors that use furniture, fabrics, decorative elements and finishes appropriate project requirements.
